Second novel in one of the greatest series ever written. Not the best in the series, but not the worst either. If you’ve read the first and you are considering continuing, you really should. If you haven’t read the first, start with The Eye of the World. As one progresses through the series more and more characters are added which may be daunting for new readers of fantasy, but all the characters stories are interesting and move the plot along nicely. Names of places and people can be confusing for those not used to fantasy writing, but the author conveniently provides a pronunciation guide at the end of the novel that can easily be referenced (although the presence of such a thing is telling in-and-of itself). This series as a whole has everything one could wish for from high fantasy: action, magic, politics, history, relationships, character growth, triumph, betrayal, hope, tragedy, comedy. Not as dark as A Song of Ice and Fire (Game of Thrones), not as light as Narnia, not as magical as Harry Potter, not as political as Malazan, and not as historical as Lord of the Rings. However, what this series accomplishes is a blend of all of these in a masterful work of art that is unrivaled in balance across themes. RIP Robert Jordan, may your work be preserved from the turning of the wheel to delight future generations, time without end.
